

TEIDE TOUR

+ OBSERVATORY

Duration: 8 hours

WITH TRANSPORTATION

Discover the impressive Teide National Park.

A magnificent tour through mountain roads and unparalleled landscapes.

Guided visit of the Observatory.

You will be accompanied by an official guide who will show you Teide National Park's most iconic places

WHAT'S INCLUDED

- Transportation.
- Starlight guide.
- Guided visit of the Observatory during the day.

WHAT'S NOT INCLUDED

- Food and drinks.
- Access for people with physical disabilities.

TEIDE TOUR EXCURSION TO TEIDE NATIONAL PARK

Throughout this excursion to Teide you will enjoy more than spectacular volcanic landscapes

Furthermore, on Teide Tour you will behold the volcanoes that caused the most recent eruptions in Tenerife. You will also learn how the Canary Islands were formed.

EXPERIENCE THE SCIENTIFIC SIDE OF TENERIFE WITH A GUIDED VISIT OF THE TEIDE OBSERVATORY

Tenerife is so much more than just sun and beaches. The island is also famous for science and its volcanoes.

You must already know that the Canary Islands are one of the three best spots in the world to observe the sky, along with Chile and Hawaii, which is why we are fortunate to have the world's largest solar observatory here in Tenerife.

The Teide Observatory began to operate in 1964 and focuses on solar observations and robotic astronomy. It is home to many solar and nocturnal telescopes, owned by different European countries.

What you probably don't know, yet, is that the researchers who work at the Teide Observatory make great contributions to the field of science, with an average of one publication per day.

And did you know that the discovery of the Sun having its own frequency and beating like a heart every five minutes was made at the Teide Observatory?

OBSERVATIONS

The visit lasts 90 min. The guided tour of the Teide Observatory is not recommended for children under 8.

CONTINGENCY PLAN

In the event that the access roads to Teide are cut off due to weather conditions, the activity will be postponed or cancelled, in which case its cost will be modified accordingly.

In the event that weather conditions impede or hinder proper visibility of the stars through solar telescopes, or if they pose a threat to the physical integrity thereof, we will visit another nocturnal telescope instead.
